## WANTS TO BOWL.

The funeral of the late George Robert Gill took place from the Presbyterian Church at Washington at 10 o'clock.

The Bouanza for Pomeroy will be up tonight.

The Queen City will be the Pittsburgh packet tonight.

The Henry M. Stanley was up last night for Pomeroy with a big trip.

Bay Bros. have entered the neat little steamer Urania in the Cincinnati-Portsmouth trade and the White Collar Line will now have to raise its hump a little and get a push on itself.

The towboat J. C. Atlee, belonging to the Memphis Wrecking Company, arrived in Memphis with 303 bales of cotton taken from the wreck of the Buckeye State, which burned at Barfield Point, Ark., recently. The cotton was in fairly good shape, and some money may be realized from it.

Part of the machinery of the steamer Liberty, being built by Captain A. H. Booth at Middleport, will be in position about Thursday, and steam will be turned on. The other part will be in position in about one month. The steamer will be ready for the excursion business about April 1st. She is a side-wheel steamer, and many compliments have been passed upon her neat lines and workmanship.

Steamboatmen are advocating the building of masts in the center of all towboats. The masts, or check-posts, could be used to great advantage among those towboats towing empties from behind. The lines could be fastened to the posts in the center of the boat, thus taking the weight off the stern of the vessel. The lines attached to fleets being towed from behind are fastened to the stern of a towboat, and it puts all the weight of the tow on the stern of the boat.

The work of correctly gaging the Mississippi river is said to have never been solved on account of the swift current of that river, but the current varies at times, which causes the instruments to gage incorrectly, according to The Memphis Commercial-Appeal. The most successful system hit upon yet is the slanting system of taking the river readings. This system is more costly than any yet devised, but has proven infinitely more satisfactory. The plan is simple enough. It is a stationary measuring apparatus extending along the bank of the river between the high-water and the low-water mark, with the different stages indicated, and having all the divisions of the yardstick. The daily changes in the volume of water passing this point are still taken on the perpendicular stake, which is placed at the foot of Beale street, Memphis, for the purpose.

## DO YOU TAKE THE LEDGER?

If not, you ought.

Please try it a month; and if you are not satisfied we will refund your 25 cents.

Chenoweth's Cough Syrup is recommended for coughs, colds, croup, whooping-cough, etc.

Mr. Virgil Fredina died yesterday at his home near Moransburg and the funeral will take place at 9 o'clock tomorrow morning at St. Patrick's Church. Burial at Washington. He was about 75 years of age and is survived by his wife.

## THE KENTUCKY WAY.

Sample of How "Corporations" Are Assessed in Two States.

The Board of Equalization of Covington knocked off \$150,000 from the assessment of the Covington and Cincinnati Suspension Bridge, reducing it from \$600,000 to \$450,000.

This is not satisfactory to the Bridge Company, as it claims the assessment is not a legal one in that the assessment was not made on the cost of what it would take to replace the bridge, but on what it was worth. The Company had data furnished by two competent engineers, which they furnished to the Board, that a modern bridge of equal strength, width and length could be built for \$350,000, up to the Cincinnati end or as far as Kentucky can assess for, but in spite of this the bridge was assessed on what it was worth instead of what it would cost to replace it.

As an instance of the difference in taxation between Cincinnati and Covington, it can be stated that 46% of the cost of the Suspension Bridge is situated in Cincinnati, and that part of it is assessed at \$218,000, while in Covington, where the other 54% is situated, the assessment is made at \$450,000 by the Board and \$900,000 by the Assessor.

## D. Hechinger & Co.

We were correct when we said a while since that we did not intend having dull January and February business. To be sure there is no profit, in fact in many instances there are losses on our sales; but we have always had a great weakness to close out one season's stock before the next season comes in, hence our stock is always fresh and new.

There still must be a good many people who have not availed themselves of securing "our kind" of

## Clothing!

At the Cut Prices we are now selling at.

Why not come in and buy an Ulster or Overcoat at a price that will save you at least one-third of the money you will have to pay for it next winter? What an excellent opportunity now to buy a Stein-Block or Adler Suit, medium weight, one that you can wear nine months out of the twelve, and buy it for less money than you buy ordinary goods for.

We will be benefited in turning these goods into money, but you will be vastly more benefited in buying them. Were we addicted to fake advertising that so many clothing men resort to, viz. the fellows who advertise \$10 suits for \$3.98, we would embellish more. The truth needs no embellishment. You know we only advertise and sell "straight goods."
